# cFACTORY™

End-to-End Business Process Validation

COMPREHENSIVE END-TO-END BUSINESS PROCESS TESTING

cFactory™ leverages ground breaking application-aware, data-driven technology to help you dynamically generate and maintain test cases. With built-in logic and data flows, you can expand your test coverage to include all possible scenarios, allowing you to speed implementation while minimizing risk.

✓ **Accelerate time to market**

✓ **Lower test creation and maintenance costs**

✓ **Extend test coverage and minimize business risk**

✓ **Meet your Agile and DevOps environment demands**

✓ **Works with prebuilt Accelerators for SAP, Oracle EBS, PeopleSoft, Guidewire, Salesforce, Workday, and T24**

AUTO CREATE

With intelligent drag and drop functionality, your business users can create full end-to-end automated test processes quickly, making you more efficient and your apps more effective.

AUTO ANALYZE

The software analyzes test data and automatically creates test flows of all business scenarios. This helps to maximize test coverage, giving you the fewest number of test sets that you need to create and maintain.

AUTO MAINTENANCE

Visual cues walk you through the process so you make quick and easy updates. Our patented Evergreen Automation™ automatically identifies defects to your system, allowing you to update your test components in just a few clicks.
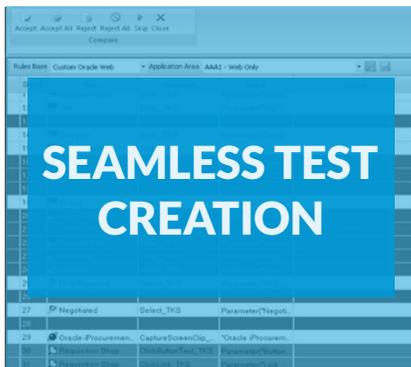

AUTO EVERYWHERE

Get cross-platform flexibility for enterprise apps and across end-to-end business processes. From HTML, ASP.NET to SAP, Oracle EBS, PeopleSoft, Salesforce, and more—test them all with one comprehensive , integrated solution.

cFACTORY™

End-to-End Business Process Validation

THE BEST TEST AUTOMATION PLATFORM ON THE PLANET

TurnKey cFactory™ is the only intelligent, data-driven framework designed to streamline testing at each stage of the testing process. Reduce your end-to-end business process, web app, UFT, Selenium, functional and regression testing time and costs while maximizing performance and availability.

SEAMLESS TEST CREATION

INTELLIGENT DATA-DRIVEN WORKFLOWS

EFFORTLESS MAINTENANCE

Automate each stage of the testing process across multiple platforms. Simply walk through your application screens as the software identifies and creates a library of test components for easy customization and reuse. Then drag and drop to create test flows and fully automate an entire end-to-end business process.

Other testing tools require potentially hundreds of test cases to get to the coverage you need, making test management a challenge. With TurnKey, expand your test coverage to cover all your possible scenarios. Our intuitive, data-driven technology guides the flow of tests to so you can maximize application quality and minimize risk.

We help you locate each change, giving visual cues to analyze and update test sets and data. With just a few clicks, users can quickly review, update and push out new test sets and data, all within HP Quality Center. This advanced automation supports a continuous, agile testing framework, saving **50%-80%** of ongoing test maintenance.

"As an organization, we now function better in our regular business processes —not just in application testing, but in what we actually do as a business."

-Mary Cathell, QA Manager, Pomeroy
