

Comprehensive Library of Pre-Built Content and Test Cases Designed with Business Priorities and Business People in Mind

Do you struggle with allocating enough time and resources to properly test your enterprise applications? Are you concerned with delivering new software enhancements before thoroughly testing them first? Do you find it increasingly hard to create all the test sets needed for accurate and in-depth test coverage? If so, then TurnKey's Application Accelerators may be the solution for you.

TurnKey Accelerators work together with cFactory™ Scriptless Testing Software to address your toughest testing challenges, delivering a comprehensive automated testing platform that is fast to implement, easy to manage and cost-effective to maintain.

Test Components and Test Cases at Your Fingertips

TurnKey Accelerators provide a library of pre-built content and pre-developed test cases to accelerate testing of your business critical processes. Leveraging HP ALM, these Accelerators help you test your applications quickly and easily, while eliminating the need for special programming expertise. Since our software emulates the way manual testing is performed today, adoption is fast and easy. With our comprehensive body of pre-built content and test cases, TurnKey's Accelerators get you up in running in weeks, substantially shortening the time to production and value.

Easy Customization for Your Specific Environment

Since your business applications are one-of-a-kind, we help you easily customize test sets and scenarios to meet your specific needs and requirements. Our intuitive UI helps walk you through the process allowing you to tailor tests to match your unique business processes. For more comprehensive, end-to-end integration, we help you create larger test scenarios using simple drag-and-drop screens. Our intelligent data-driven technology then automates the execution of these tests either immediately or at a later scheduled time.

Powerful, Trouble-free Maintenance Built-in

A single change has the potential to have almost unlimited impact on your business processes across the organization. With TurnKey software, we help you maintain your applications with minimal time and effort. For large changes such as critical patch updates, you get updated test cases as part of your Accelerator maintenance package. For smaller changes, like patches or upgrades, our cFactory software auto-maintains tests within the HP ALM platform. This process is fast and easy, requiring just a simple point and click.

A Single Testing Tool for Your Business

Unlike many test automation solutions on the market, ours is not a “one trick” point solution. We leverage the features of HP ALM to support most major application technologies and platforms. This means you can validate entire end-to-end business processes that span multiple systems and technologies, all within a single testing tool.

TurnKey Software Components

- TurnKey Application Accelerators— comprehensive libraries of pre-built BPT components and test cases for Guidewire, Oracle EBS, PeopleSoft, SAP, Salesforce, Temenos, and others. Test assets are available for easy customization and reuse.
- cFactory Scriptless Testing Software— automated, BPT component generator that works with any application supported by UFT. Delivers data-driven architecture for advanced automation and streamlined maintenance.
- HP ALM— unified application lifecycle management software that helps you to define, build, test and delivery quality, enterprise applications.

> *Accelerate time to market*

> *Lower costs in test creation and maintenance*

> *Extend test coverage to minimize business risk*

> *Meet the demands of a dynamic agile environment*
