FASTER TIME TO VALUE

In today's agile business environment, adding more manual testers doesn't deliver the required cost effective and high performance needed to drive your business. TurnKey's Oracle EBS Accelerator combined with cFactory data-driven, intelligent test automation lets you and your team achieve high velocity testing without compromising on speed, cost, or quality. Test a full range of Oracle EBS features while saving 80% on testing time and 50% on costs!

- Cut end-to-end testing from 3 months to 3-4 days
- Eliminated need for 20 people to assist in the process
- Increased test coverage across entire end-to-end business processes

ORACLE ACCELERATOR

End-to-End Business Process Testing

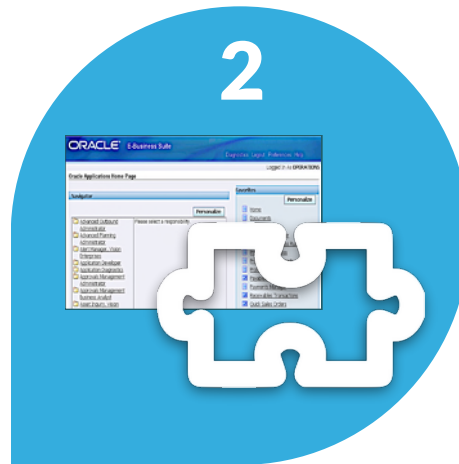

HOW IT WORKS

1

Jumpstart test automation with pre-built test cases and content. Oracle Accelerator includes a full library of pre-built content and pre-automated test cases for your Oracle EBS modules, including Financials, HR, Manufacturing, Projects, Procurement, CRM, and more.

2

Streamline end-to-end business process tests such as order-to-cash, or procure-to-pay, individual test cases can be easily combined into larger scenarios. Oracle Accelerator makes adoption and usage fast and easy with a drag-and-drop interface and simple end-to-end test case execution.

3

Enjoy powerful, trouble-free maintenance with automatic test case critical patch updates or upgrades. For smaller changes, Accelerator is customizable and adjusts quickly to your test sets and content. And cFactory analysis immediately identifies Oracle changes and affected test data.

ROI THAT IS OMG

Real customer ROI.*

“TurnKey is head and shoulders above the rest in terms of maintainability, efficiency and ease of use.”

-Brendan Woods, Group Head of Systems Delivery, Almac
